NICHITA CEBOTARI

GAMEPLAY ENGINEER

A Gameplay Engineer with a strong inclination for Technical Art, bridging the gap between code and visual fidelity. Advanced in Unity (C#) and Unreal Engine 5 (Blueprints). Passionate about creating intuitive tools and scalable systems that empower design and art teams to iterate faster.

- Seeking a Graduation Internship — Feb 2027
- Open to relocating across Europe and USA

PROFESSIONAL EXPERIENCE

Saxion University | Teaching Assistant — Programming Fundamentals (Unity/C#) & Rendering Engines (C++/GLSL)

Enschede, NL | Sep 2026 – Present

- Facilitate bootcamps and prepare materials for two courses: Programming Fundamentals, a first-year Unity/C# course, and Rendering Engines, a second-year course building a custom C++ rendering engine from scratch — guiding students through exercises and Q&A.

Saxion XR Lab | UE5 Technical Artist & VR Engineer Intern

Enschede, NL | Feb 2026 – Jul 2026

- **ICover (Client: Ministry of Defence of the Netherlands)** | Developed environmental VFX and atmospheric post-processing (Niagara) to drive visual immersion in a VR military training simulation. Managed the full Xsens motion capture pipeline, from recording live actors to cleaning and integrating final character animations in-engine.
- **Quantum Delta (Client: University of Twente Labs)** | Engineered a high-fidelity VR liquid and chemistry simulation using UE5 Blueprints, Shaders, and Niagara. Developed custom math-driven fluid physics to handle realistic pouring, absolute volume tracking, and real-time chemical reactions.

Enschede, Netherlands

SKILLS

Engines & Languages

- Unreal Engine - Advanced
- Unity 6 - Advanced
- C# - Advanced
- C++/GLSL - Intermediate

Technical Design & Art

- VR Development (Meta Q3)
- Motion Capture (Xsens)
- Shader & VFX Creation
- Data-Driven Architecture
- Custom Editor Tools

Tools & Production

- Git (+LFS) & Azure DevOps
- Jira / Agile / Scrum
